2020

ZOOLOGY — HONOURS

Paper: CC-2

(Molecular Biology)

Full Marks: 50

The figures in the margin indicate full marks.

Candidates are required to give their answers in their own words as far as practicable.

1. Answer any fifteen questions:

 2×15

- (a) State the function of DNA ligase.
- (b) What is Degeneracy of Genetic code?
- (c) What is telomere? Write two significance of telomere sequence.
- (d) Define promoter clearance.
- (e) DNA Replication is semi-discontinuous Explain.
- (f) What is primosome? Mention its components.
- (g) Define Alternate splicing and mention its significance.
- (h) Mention the significance of 'P' site and 'A' site of ribosome.
- (i) Distinguish between prokaryotic and eukaryotic transcription (any 4 points).
- (i) Define split genes.
- (k) What is DNA hyperchromic shift?
- (l) Briefly mention the function DNA glycosylase.
- (m) State the bonds involved in DNA structure (Name only).
- (n) What is RNA editing?
- (o) Write two significance of Northern Blot.
- (p) Define 'Glucose Effect' in connection to Lactose operon.
- (q) Mention the function of β -galactosidase and permease.
- (r) State the function of miRNA.
- (s) Briefly mention the role of enhancer sequence.
- (t) Trp repressor is a positive allosteric protein– Explain.
- (u) Define 'Shine-Dalgarno' sequence.

Please Turn Over

T	(1st Sm)-Zoology-	H/CC-2	CRCS
	(131 13111.	j-Zooiogy-	11/00-2	CDCS

(2)

- (v) Mention θ (theta) model of replication.
- (w) Write at least two mechanisms of epigenetic gene regulation.
- (x) Mention the role of 'Lex A' repressor in SOS repair.
- (y) Describe the role of 'Clamp loader' in DNA replication.

2. Answer any four questions:

(a)	Elaborate the process of ρ -independent transcription termination with labelled diagram.	3+2
(b)	With neat figure, mention the structure and function of oriC.	21/2+21/2
(c)	Describe the process of polyadenylation of mRNA with diagram.	3+2
(d)	Explain the process of positive control of lactose operon.	5
(e)	Write short note on Histone methylation and acetylation.	5
(f)	With neat diagram, explain the process of Allele Specific PCR amplification.	5
(g)	Mention the porcess of 'Nucleotide Excision Repair' is prokaryotes.	5
(h)	Write the principle and procedure (with figure) of Western Blot technique.	11/2+31/2
