## 2021

## **ZOOLOGY — HONOURS**

Paper: CC-11

(Ecology)

Full Marks: 50

The figures in the margin indicate full marks.

Candidates are required to give their answers in their own words as far as practicable.

## Answer any ten questions.

(a)	What is 'Autecology'?	
(b)	Define Ecological Efficiency.	
(c)	What is population dispersal?	2+2+1
(a)	How does major community differ from minor community?	
(b)	What is meant by 'Primary Productivity' of an Ecosystem?	
(c)	What is Umbrella Species?	2+2+1
(a)	What is Niche overlap?	
(b)	Define in-situ conservation with suitable example.	
(c)	Comment on Biosphere Reserve.	1+(1+1)+2
(a)	What is meant by Ecophene and Ecotype?	
(b)	Compare the role of Grager and Decomposer in an Ecosystem.	2+3
(a)	The human survivorship curve is highly convex. — Explain.	
(b)	What is Carrying capacity?	3+2
(a)	What is biotic potential?	
(b)	Distinguish between specific mortality and ecological mortality.	2+3
(a)	Define photoautotroph and chemoautotroph.	
(b)	Elaborate how light and water regulate net primary production in an ecosystem.	2+3
(a)	Mention the significance of life tables.	
(b)	Explain 'Inverted Pyramid'.	2+3
	(b) (c) (a) (b) (c) (a) (b) (c) (a) (b) (a) (b) (a) (b) (a) (b) (a) (b) (a)	<ul> <li>(a) What is 'Autecology'?</li> <li>(b) Define Ecological Efficiency.</li> <li>(c) What is population dispersal?</li> <li>(a) How does major community differ from minor community?</li> <li>(b) What is meant by 'Primary Productivity' of an Ecosystem?</li> <li>(c) What is Umbrella Species?</li> <li>(a) What is Niche overlap?</li> <li>(b) Define in-situ conservation with suitable example.</li> <li>(c) Comment on Biosphere Reserve.</li> <li>(a) What is meant by Ecophene and Ecotype?</li> <li>(b) Compare the role of Grager and Decomposer in an Ecosystem.</li> <li>(a) The human survivorship curve is highly convex. — Explain.</li> <li>(b) What is Carrying capacity?</li> <li>(a) What is biotic potential?</li> <li>(b) Distinguish between specific mortality and ecological mortality.</li> <li>(a) Define photoautotroph and chemoautotroph.</li> <li>(b) Elaborate how light and water regulate net primary production in an ecosystem.</li> <li>(a) Mention the significance of life tables.</li> <li>(b) Explain 'Inverted Pyramid'.</li> </ul>

5th Sm.)-Zoology-H/CC-11/CBCS  (2)			
9.	(a)	Distinguish between r-selected and K-selected species.	
	(b)	What is species evenness?	3+2
10.	(a)	What do you mean by 'Biodiversity Hotspot'?	
	(b)	Distinguish between 'Density dependent' and 'Density Independent' factors of population	regulation. 2+3
11.	(a)	What do you mean by Vulnerable and Endangered species? Give example of each.	
	(b)	Name one 'Vavilov centre of plant origin' in India.	1+1+1+1+1
12.	(a)	Compare between 'Flagship' and 'Keystone' species.	
	(b)	What is 'Red data book'?	
	(c)	Name one 'Bird Sanctuary' in India.	2+2+1
13.	(a)	Differentiate Primary and Secondary succession.	
	(b)	How succession categorize on the basis of nutritional and energy contents?	2+3
14.	(a)	Write importance of detritus food chain.	
	(b)	What do you mean by 'Eltonian Pyramid'?	21/2+21/2

1+2+2

(b) Write the advantages and problems of Ecosystem corridor.

15. (a) What is corridor in ecosystem?
